
Same original post-fault circuit and controls; selected states transplanted from R75 recovery
Phase change after transplant [turns]
Remote total Pcap [pu]
Remote frequency deviation [Hz]
Remote internal angle / slack [rad]
Time since transplant at original absolute t=2.99 s [s]
Time since transplant at original absolute t=2.99 s [s]
No transplant
Voltage PI states
Current PI states
Q-filter states
D2 washout states
Local electrical states
Angle/speed (electrical phasors aligned)
All hidden controller states
Full recovered state
