Bus5 load / capacitor and slack interconnection 5-6
P6to5 and Q6to5 are powers from Bus6 into the line, before line losses

D1 = 10

D1 = 20

Voltage magnitude [pu]

Bus5 voltage

Current magnitude [pu]

Line 6-5 current
Load current
Shunt-capacitor current

Active power [pu]

Sending-end P: 6 to line 5-6
Bus5 consumed P

Reactive power [pu]

Sending-end Q: 6 to line 5-6
Bus5 capacitor Q injection

Terminal phase / Bus6 [rad]

Bus5 phase / Bus6

Time from prefault initialization [s]
