Supplement: swing-equation power, internal angle and filter current
D1 = 10
D1 = 20
Remote active power [pu]
Remote total Pcap
Remote total Pterminal
Total Pset=1.2
Phase / slack Bus6 [rad]
Remote mean internal angle
Remote mean terminal phase
Filter-side current |If| [pu]
Bus 1 filter-side |If|
Bus 2 filter-side |If|
Bus 3 filter-side |If|
Bus 7 filter-side |If|
Time from prefault initialization [s]
